

flexiFED 1 Preventative Dentistry Benefit

The flexiFED 1 option offers a preventative dentistry benefit to help members take care of their dental health, and prevent serious dental issues before they arise. Let's take a look at what this full benefit entails.

Basic preventative dentistry which includes X-rays and scaling and polishing is covered from the Savings Account. When your day-to-day claims have accumulated to your threshold level, preventative dentistry is paid out of the threshold benefit. The preventative dentistry benefit covers two annual consultations per beneficiary including scaling and polishing.

These consultations are subject to a list of approved procedures, dental tariff codes and protocols at the Fedhealth Rate. See below for a complete list of dental codes applicable to this benefit.

Dental codes

Code	Code Description	Limitations
8101	Consultation	2 per beneficiary per year
8107/8112	Intra oral radiographs, per film	Maximum of 2 per beneficiary per year
8109	Infection control / barrier techniques. Code 8109 includes the provision by the dentist of new rubber gloves, masks, etc. for each patient	4 per year: 2 per visit
8110	Sterilised instrumentation	2 per year: 1 per visit
8159	Scaling and polishing	2 per beneficiary per year
8161	Topical application of fluoride	Between the ages of 3-12 years 2 per beneficiary per year
8163	Fissure sealant, per tooth	Patients younger than 14; maximum of 8 per year; 2 per quadrant
